

WORLD CLASS SOLUTIONS FOR BONDING, CLEANING, LUBRICATING FASTENING & MAINTENANCE

**YOUR MRO, ASSEMBLY &
TOOLING SPECIALISTS**

ACC Gulf LLC was established in 2002 following the acquisition of Technical & Leisure Supplies Co, a leading supplier of quality industrial maintenance and repair products in the UAE and the Middle East.

Since then ACC Gulf LLC has expanded both in terms of its product portfolio and our team. We offer our products and services to over 20 countries in the Middle East, Africa & Indian Sub Continent. Our efficient and experienced technicians and staff travel to support these markets at end user level as well as through distributors.

We have the reputation for selling products of the highest quality yet at prices that suit our demanding customers. We have qualified technical staff who support industry and are experts at problem solving. Our service centre at Dubai has the ability to repair and maintain tools for our customers. Our branch in Abu Dhabi opened in 2012 to help develop and support our customers in the Eastern Emirates and Al Ain.

OUR TEAM & EXPERIENCE

We have a team of 22 sales, administrative, accounts and support staff based in our Dubai Head Office and our Abu Dhabi Branch Office. All staff are extensively trained in their discipline whether locally or at our principles training facilities overseas. Continual training programmes are organized to keep us up to date with the latest developments in industry. We have the ability to 'problem solve' in the field and offer a full technical support function to our customers.

ACCGULF LLC

VISION & MISSION

We aim to build on our reputation in the Region as a professional, committed and supportive distributor in all industrial markets and in all supply channels. Our mission is to listen to our customers and supply products that meet or exceed their requirements. Working in a demanding environment where on time delivery is critical we pride ourselves on our ability to meet deadlines. We push ourselves continually to offer cutting edge products that will help industry in the area work more efficiently and cost effectively. The support of our principles helps achieve this objective.

QUALITY

All the companies and brands we represent are 'top tier' companies who pride themselves on the quality of their products. All products go through rigorous quality control procedures before being shipped to us and all our suppliers have ISO 14001 /9001 accreditation. Many of our products have industrial approvals with some of the leading companies worldwide. Our service is 'second to none'. Most orders are delivered within 24 hours of receipt. We also deliver to some markets directly from our principles factories in Europe.

WORLD CLASS BRANDS

Quality European Industrial and Consumer Tapes

UK manufactured Industrial Adhesives and Sealants

Glue Applicators and Sticks/ Slugs for a wide range of applications

Self Clinching Studs, Pins and Nuts

Industrial MRO Products

Epoxy Adhesives for Industrial and Consumer applications

Industrial Hot Melt Adhesives

Gasketing, Sealing and Industrial Repair products

Fasteners and Fastening Tools

Competitively Priced Fasteners, Pneumatic Drills, Screwdrivers, Impact Wrenches, Sanders and Rivet Guns

Industrial Pneumatic and Battery Tools and Rivets

Lockbolt Pin and Collar Fastening Systems

Quality Water Based Adhesives

APPLICATIONS / SOLUTIONS

ACC Gulf have a wide range of products for most applications and industries giving a solution to the most demanding tasks. As we are a Assembly and MRO and tooling specialist most of the brands we market have applications in most industries. Below are listed just a few brands and relevant applications in key industries.

AEROSPACE

- Ambersil MRO products have a number of aerospace approvals for critical and non critical applications.
- ACC Silicones have a range of high temperature silicones used in this industry.
- Hylomar Gasketing materials are used and approved by Rolls Royce.
- Araldite (Huntsman) adhesives can be used in demanding aerospace applications.

OIL AND GAS

- Hylomar have a number of Oil and Gas approvals.
- Bondloc Anaerobic materials are used in threadlocking, retaining and sealing applications.
- Araldite Epoxies are used in critical oil rig applications.

SHIP REPAIR

- Ambersil products are listed in the ISSA guide for ship maintenance including fault finding, cleaning and degreasing and metal working.
- Bondloc have epoxy metal products used in this industry.

LAND AND RAIL TRANSPORT

- Ambersil protective coatings, metal working and lubricants are used extensively in this industry.
- Araldite epoxies are used in the building and repair of metro and tram stations.
- ACC Silicones have many silicones used in train manufacture and repair
- HPX Tapes have many applications in repair and maintenance

MANUFACTURING

- ACC Silicones provide products for the manufacture of all types of panels in white goods manufacture.
- Bondloc supply syringe type adhesives in the same industry. Their anaerobics are used in all manufacturing industries.
- Power Adhesives have products for sign and display stand manufacture.
- Ambersil Metal Working, Cleaning and Moulding products are used widely in manufacturing.
- Beardow Adams and Power Adhesives products are used in mattress making, furniture production and the white goods industry.
- HPX Tapes can be used in a number of general applications.

FOOD AND DRINK

- Beardow Adams Hot Melt Adhesives are used for Packing, Labeling, Straw attachment and pallet stabilization.
- Power Adhesives gluesticks and applicators are also used primarily in the Packaging industry.

AUTOMOTIVE

- There are a number of Hylomar products which are used in OEM and servicing vehicles.
- Bondloc threadlockers, sealing and instant adhesives are used in engine maintenance.
- HPX Tapes have automotive products such as Butyl Sealing Tapes.
- Ambersil Cleaners and Lubricants are used for repair and maintenance.

INDUSTRIES FOR RIVETS

ROOFING AND CLADDING

- We carry a full range of rivets for this industry in different material combinations.
- Available material combinations for these rivets are: Aluminum, Aluminum/stainless steel and fully stainless steel.
- Painted rivets are also available for: Bulbtite, closed end and structural rivets.
- For applying rivets on site we have a range of battery tools to suit all your needs.
- These products are available from Gesipa and Dimensions.
- Ambersil products can be used in metal protection and cleaning.

SWITCHGEAR

For the Switchgear industry we carry a full range of rivets which include:

- Rivet nuts, structural rivets and lockbolts.
- All of these are either available from: Avdel, Gesipa, Titgemeyer and Dimension.
- Hylomar Universal Blue can also be used in the Switchgear industry.

DUCTING AND VENTILATION INDUSTRIES

- Multigrip and closed end rivets are suitable for all ducting applications.
- These are available from Gesipa, Avdel and Dimension.
- HPX Tapes have some applications in this industry.

CONTAINER REPAIRS

- For Container repairs and ULD maintenance we recommend Multigrip and closed end rivets.
- These are available from: Titgemeyer, Avdel and Dimension.
- Ambersil products are used for rust protection.

REFRIGERATED TRANSPORT

- Structural, closed end and stainless steel rivets can be supplied and used for these types of applications.
- These rivets are available from Avdel, Gesipa and Dimension.

Wide range of products

ADHESIVES

We carry an extensive range of adhesives from industrial adhesive tapes, anaerobic and cyanoacrylate adhesives, structural adhesives through to Hot Melt Adhesives and applicators.

Brands include HPX Tapes, Bondloc, Araldite, Hylomar, Beardow Adams and Power Adhesives. Industrial sectors include Manufacturing, Food and Drink, Aerospace, Road and Rail Transport and Marine.

GASKETING MATERIALS

Hylomar Ltd is the manufacturer of a wide range of performance sealants, threadlockers, adhesives & more...including Hylomar Universal Blue, Hylomar Racing Formula & Hylomar PL32- Aerograde non-setting sealants. Hylomar non-setting sealants are the world market leader in its class & the recognized standard for this application. Hylomar Universal Blue, originally developed over the years by Hylomar chemists & engineers to create high performance solutions for sealing flanges & threads in many industries worldwide.

HOT MELT ADHESIVES

Beardow Adams is focused upon the development & manufacture of hot melt adhesives & hot melt pressure sensitive adhesives. The products have unrivalled quality, reliability, service & innovative products. Beardow Adams is among the top five hot melt producers in Europe

INDUSTRIAL ADHESIVES & SEALANTS

Whatever the application, there's a Bondloc UK adhesive or sealant product to meet the requirement. As one of the UK's leading manufacturers & producers of an extensive range of innovative products, the formulations developed by their research & development team at Bondloc UK have been the professional's first choice for adhesives and sealants for well over 10 years. For the engineering, automotive, marine, heavy plant & agricultural industries, there's no choice to make-it has to be Bondloc Adhesives & Sealants.

HOT MELT STICKS / SLUGS / APPLICATORS

Power Adhesives Ltd, Europe's leading shaped hotmelt adhesive specialist, offer the largest range of high quality, competitively priced hotmelt adhesives & hand-held industrial applicators in the world. Power Adhesives products are sold under the TEC and TECBOND brand names and enjoy a unique position to offer industry specialist knowledge on all aspects of commercial gluing operations using thermoplastic adhesives.

EPOXY ADHESIVES & TOOLING PRODUCTS

Araldite 2000 Plus adhesives for metals can be used under a broad spectrum of processing & curing conditions & can meet the most demanding performance requirements. The range includes leading edge epoxy, polyurethane & toughened acrylic technologies providing a complete solution to structural bonding.

ADHESIVE TAPES

HPX Tapes have over 20 years experience in self adhesive tape manufacture where quality is the keyword. The central Europe location in Belgium is a big advantage to supply chains. Their advanced laboratories allow demanding tests to be done to ensure ASTM/AFERA standards are met. Key product areas are foam tapes, carpet tapes, mounting tapes, automotive tapes and duct tapes. Our focus is on industrial and automotive markets.

Wide range of products

MRO-PRODUCTS

Ambersil have a variety of one part Silicone Sealants to cover a wide range of industrial uses. They also come in different colours. Our spray adhesives ranges includes MP 100 General purpose, HS 300 High strength, QS 900 Quick stick & NC 500 Non chlorinated 400 ml aerosols.

CLEANERS & DEGREASER

Ambersil has the widest range of cleaners & degreasers available to the industry. From Ambercleans Foaming Cleaner, Stainless Steel Cleaner & Aquasafe Biogradable Cleaner to Ambertron contact Cleaner, Amerklene FE10, ME20 & LO30 solvent based cleaner degreasers we have the product for all industrial application

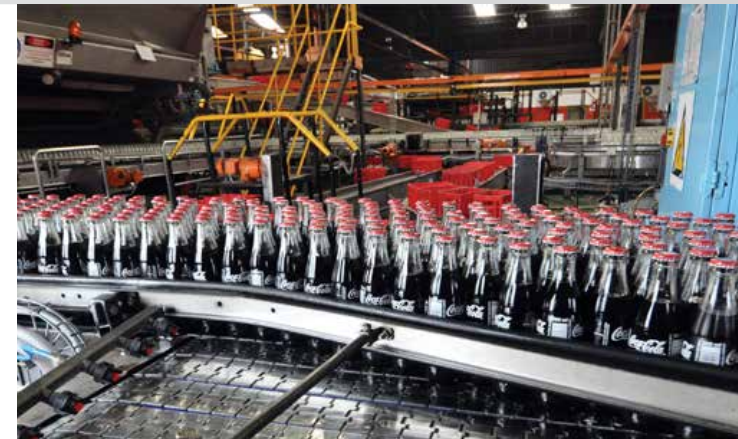

LUBRICANTS

Ambersil lubricants target today's demanding industry. +40 Protective lubricant, PX 24 Heavy Duty Lubricant & Silicone Lubricant all have industrial all have industrial approvals. Penetrating Oil, Gear & Wire Rope Lubricant & Chain Spray are industry standard products. Ambersil also has a wide range of industrial greases.

FOOD GRADE PRODUCTS

The Ambersil range of "Food Processing Safe®" products is one of the most comprehensive available. These products offer a complete chemical solution to the professional engineer who works in the food, beverage or pharmaceutical industries. All the products are NSF registered for proven risk reduction and backed up by Ambersils technical manufacturing capabilities.

METAL WORKING

Ambersil Tufcut Metal Cutting Lubricant product come in spray, liquid, foam & paste form. They can be used on a wide range of metals including Stainless, High Carbon & High Tensile Steel. Each product has its own niche in industry depending on the accessibility to the work area and the type of application.

ANTI CORROSION /PAINTS

Ambersil Anti Corrosion products include Matt & Bright Zinc Rich Protective coatings, Primers High Temperature products & products for Aluminium & Stainless Steel. We also have SV100 Anti Tracking Insulating Film available.

POLYMER PROCESSING

Ambersil has the most comprehensive range of Mould Release and associated products in the market. Products include release agents, protectives, cleaners and compounds for all types of plastic, rubbers, and composite moulding operations. Operations include rotational, injection and rubber moulding. Silicone and Non Silicone release agents are available depending on whether post moulding operations such as painting, bonding or plating are required.

Wide range of products

FASTENERS AND TOOLS

FASTENERS

We represent world famous brands such as Avdel and Gesipa, both European quality manufacturers. Our range of rivet based products vary greatly, from the 'original' standard blind rivet through to a high strength structural rivet with extremely high performance values in relation to clamp, shear and tensile values. Our rivets are available in a range materials including aluminium, steel, stainless steel, copper, and plastic to meet most application requirements. Each product range within the rivet portfolio has been developed to suit different applications.

PNEUMATIC RIVETING TOOLS

Gesipa's range of Taurus industrial pneumatic riveting tools are available in different models capable of setting rivets from 2.4mm to 8mm diameter. Avdel have a number of excellent tools for different applications. The 742 tool for rivet nuts is now been replaced by the XTN20 tool. The NG4 is for placing Lockbolts and the 732 tool is used on larger Lockbolt sizes. We have a tool for every application.

BATTERY TOOLS

Gesipa have a range of Battery Tools used in remote application areas such as roofing. The Accubird tool is used to set 4.8 mm rivets while the Power bird tool is used on 6.4 mm rivets. The Firebird is used for placing rivet nuts. All tools come with convenient carry case.

AIR TOOLS

ACC Gulf supply a number of quality air tools from the Far Eastern markets. We understand our market requires quality tools but at a competitive price point. We have done that and have developed our own branded tools for the Middle East market. Main tooling areas are Impact Wrenches, Drills, Screwdrivers, Die Grinders, Palm Sanders and Rivet Guns. All manufacturing and industrial sectors use our products.

QUALITY

QUALITY & SERVICE

All the companies and brands we represent are 'top tier' companies who pride themselves on the quality of their products. All products go through rigorous quality control procedures before being shipped to us and all our suppliers have ISO 14001/9001 accreditation. Many of our products have industrial approvals with some of the leading companies worldwide.

Our service is 'second to none'. Most orders are delivered within 24 hours of receipt. We also deliver to some markets directly from our principle's factories in Europe.
